PLANS

1 May 1951

MEMORANDUM FOR: Chief, Medical Staff

FROM: Chief, Program Coordination Division

SUBJECT: Medical support for three main areas in the event of an atomic disaster

1. A series of five peripheral collecting points on the periphery of Washington, each of which is staffed by five-man teams of technicians, specifically trained in the management of radiation equipment is recommended. Two of these technicians will work out of each of these areas in a station wagon which is equipped with space to transport at least two patients, a voice commo apparatus and the following medical support equipment:

List #1
List #2A
List #2
List #3
List #4
List #5
List #6

2. A decontamination center approximately half way between the center of Washington and the refuge headquarters is required. Located at this center should be the following personnel and equipment:

- a. One medical officer
- b. one health physicist
- c. five technicians
- d. 10 non-specialized workers
- e. List #7
- f. List #8
- g. List #9
- h. List #10
